

Fiscal Compliance Audit Dossier: Vision Operations (EBS org 204), 50 expense reports

Status: DRAFT for internal fiscal review. Prepared 2026-10-05 from live EBS data (ebs_list_expense_reports, ebs_get_expense_reports). Line-level detail is also in expense_audit_org204_2026-10-05_lines.csv beside this file.

Grantee / Operating Agency: Vision Operations (EBS org 204)

Funding Agency / Source: Unspecified (state/local indicated, but no agency rules supplied)

Audit Standard Applied: 2 CFR Part 200 Subpart E as the baseline; GSA per diem for travel (not testable, see Notes)

Period of Performance: Not available in the data

Audited Period: Reports submitted 2010-07-13 through 2010-09-29

Population: The 50 most recent of 1,841 expense reports in org 204 (2.7%); the other 1,791 were not examined. Results describe this sample, not the whole unit.

Reviewer role: Fiscal officer (draft)

Baseline Compliance Notice: No state or agency travel rules were provided, so these reports were evaluated against 2 CFR Part 200 as the authoritative public sector baseline. If the expenditures are funded from state or local general revenues, cross-reference these findings with the applicable administrative code. The data is from 2010, before the Uniform Guidance took effect (December 2014), so the OMB cost circulars governed at the time. The relevant prohibitions (entertainment, alcohol, reasonableness) have long-standing equivalents, but the citations should be re-confirmed for the actual funding source.

1. Executive Summary & Audit Scorecard

Metric	Value
Reports audited	50 (17 employees, 305 lines)
Total Claimed Expenditures Audited	\$188,462.10
Total Allowable Expenditures	\$0.00
Total Questioned Costs (unverified or incomplete)	\$154,551.27
Total Outright Unallowable Disallowances	\$33,910.83
Questioned plus Unallowable Ratio	100.0%
Single Audit Reporting Required (> \$25,000, federal awards only)	N/A (funding unspecified). YES if federal: questioned costs alone are \$154,551.27.
Overall Fiscal Compliance Rating	HIGH RISK

Every report is PAID in full, 1 to 11 days after submission. EBS flagged zero policy violations on any of the 305 lines. No line has an electronic receipt or attachment, and no approver is recorded on any report. Header receipts status is REQUIRED (paper receipts never received) on 48 of 50 reports; only 2 (W39110, W39111) show RECEIVED, and those carry an audit code. Yet 301 of 305 lines are marked receipt-verified at line level, which conflicts with the header. Allowable is \$0.00 because nothing is documented under 2 CFR 200.403(g), not because every line is improper. The \$33,910.83 classed as unallowable is non-curable even with receipts.

2. Pattern Analysis

Month-to-month cloning. 15 of 17 employees have two or more reports whose non-airfare lines are identical to the dollar and in wording (45 of 50 reports). Airfare is usually the only line that changes. Examples:

Employee	Reports (submitted)	Identical non-airfare lines, total each	Airfare by report
972 Lewis, Mr. David (Dave)	W39097 (2010-08-02), W39254 (2010-09-02)	\$4,165.00	\$2,707.00, \$2,699.00

Observations (leads for follow-up, not findings of fraud):

- Real, separate business trips are unlikely to produce a dinner, hotel stay and car rental that match to the cent every month. Possible explanations are a copied template or recurring charges. Each needs documentary support, and with no receipts the duplicate-billing test (2 CFR 200.403(c), 200.405) cannot be completed.
- Sightseeing car rentals ('Ferrari', 'BMW-cabriolet', 'Rolls Royce') appear on 31 lines totaling \$19,714.51 across several employees, with identical wording. Concert and baseball tickets plus transport to the concert add \$14,196.32. All are unallowable under 200.438.
- Free-text wording repeats across unrelated employees ('Dinner with Client's Project Management', 'Only Executive Suite available', 'Monthly team call'). This suggests copying, or seeded test data if this is a demonstration database. If it is test data, the control findings (no receipts, no policy flags, Entertainment mapped to a Miscellaneous rule) still stand as a configuration review.
- Hotel lines that state nights imply \$136.00 to \$252.50 per night. No locality is recorded, so none can be tested against GSA. Hotel 'Meals (3 days)' lines and meals coded as Hotel or Entertainment indicate expense types are being used inconsistently (2 CFR 200.403(c)).
- Receipts are inconsistent across the three places EBS records them. There is no electronic image on any line; 48 of 50 report headers still say paper receipts are REQUIRED and never received; but 301 of 305 lines are flagged verified. All 50 reports were nevertheless paid in full (1 to 11 days after submission), and the policy engine raised no violation.
- Airfare: 45 of 47 airfares (\$103,751.88) are domestic business class; only 2 are coach. 2 CFR 200.475(e) allows only the coach fare unless an exception is documented.
- Meals record an attendee count on 51 lines; per-attendee amounts are shown in the matrices. Example: W39254's \$981 dinner lists 9 attendees (\$109.00 each). Attendee first names are recorded on the line, which is not enough to tell employees from clients.
- Not one of the 305 lines carries an award, project or task number, so nothing in this sample is charged to a grant. The funding stream (Principle 1) therefore cannot be shown to be federal; the 2 CFR 200 baseline is applied as the skill directs, but it may not be the governing regime for these costs. ebs_get_award_terms lists 50 awards in the

instance (all under a different operating unit, 1448); none of the 305 sampled lines references one.

- A duplicate scan with ebs_find_duplicate_expense_lines over org 204 reports submitted 2010-07-01 to 2010-10-31 (lines of \$100 or more) found 56 groups where one employee repeats the same line (type, amount, wording) on two or more reports, 56 of them on three reports, and no same-day double entries. Some groups include reports outside the 50 sampled, for example W38944 (employee 972's third Ferrari rental), which shows the recurrence extends beyond this sample.
- No expense date falls after its report's submission date, and every report reconciles: line amounts sum to the report total.

4. Request for Information (RFI) & Cure Checklist

Deadlines are for the agency to set, since no award terms were provided.

- **All 50 reports:** Receipts. EBS holds no electronic attachment on any line, and 48 report headers still show paper receipts as required and not received. Locate the paper receipts or confirm who verified them.
- **Business-class airfares:** Itinerary, fare class and any approval or exception for each domestic business-class ticket.
- **Approvals:** The approver and approval date for each report; EBS records none on the report header.
- **Meals (including those coded Hotel or Entertainment):** Itemized receipts, attendee lists and business purpose. Alcohol must be separated and disallowed.
- **Hotel:** Folios with nights and city. Prior written approval for every suite exception ('Executive Suite', 'president suite').
- **Airfare:** Airline receipts with itinerary and fare class. For foreign travel, the carrier and any Fly America waiver.
- **Local car rentals and mileage:** Rental agreements or mileage logs showing business purpose, dates, miles and rate.
- **Recurring claims (15 employees):** Evidence that each month's dinner, hotel and car rental was a separate, real trip (dates, locations, client or project).
- **Unallowable lines (\$33,910.83):** Nothing is curable. Repayment or transfer to non-reimbursable funds is the only path.

5. Corrective Action Plan (CAP)

Ref	Deficient Condition	Required Corrective Action	Responsible Party	Deadline
CAP-01	\$33,910.83 of entertainment, sightseeing and associated transport was paid	Recover from claimants or reclassify to non-reimbursable funds	Grants/fiscal officer	Agency to set
CAP-02	No electronic receipt on any of 305 lines; 48 of 50 paid reports still show paper receipts REQUIRED	Hold payment until required receipts are received, and reconcile header and line receipt flags	Expense approver / AP	Agency to set

Ref	Deficient Condition	Required Corrective Action	Responsible Party	Deadline
CAP-03	Policy engine reported OK on every line, including sightseeing tours and concert tickets; Entertainment maps to 'US - Miscellaneous'	Review iExpense policy setup. In org 204 the configured receipt rules require a receipt for Hotel, Car Rental and Telephone Calls at any amount and for Meals, Entertainment and Miscellaneous above \$24.99; Airfare and Mileage need none. The setup holds no spending caps, and expense policy schedules (per diem or lodging limits) were not examined.	EBS iExpense administrator	Agency to set
CAP-06	45 domestic business-class airfares (\$103,751.88) were paid	Apply the coach-fare rule and require documented exceptions	Travel policy owner	Agency to set
CAP-07	No approver recorded on any of 50 reports; all paid within 11 days	Confirm approval evidence and segregation of duties in the approval workflow	Expense approver / EBS administrator	Agency to set
CAP-04	Month-to-month reports identical to the dollar for 15 employees	Duplicate/cloned-claim review; add a duplicate-detection rule on near-identical report totals and lines	Fiscal officer	Agency to set
CAP-05	Expense types used inconsistently (meals coded Hotel/Entertainment, internet coded Telephone)	Expense-type training and validation	Expense policy owner	Agency to set

Notes and Limits

- **Not tested:** Per diem and lodging against GSA rates (no travel locality in the data; rates are not quoted from memory), period of performance and budget ceilings (no award data), and any expense policy schedules (per diem or lodging limits), which are not yet exposed by a tool.
- **Receipt rules:** Receipt requirements come from ebs_get_agency_policy_rules for org 204 (require_receipt_amount is the amount above which a receipt is required). Earlier drafts of this dossier called these thresholds of unconfirmed meaning and counted 238 lines in breach; both were corrected after the line-level and header-level receipt fields were read, which show the receipts as verified at line level and required at header level.
- **Scope:** The 50 most recent of 1,841 reports in org 204. Results describe this sample only. Other operating units were not examined.
- **Classification method:** Line classifications are rule-based on expense type and justification text, applied uniformly, and reviewed for the patterns above. Lines classed QUESTIONED or INCOMPLETE are curable with documentation; they are not findings that the cost was improper.
- **Source:** Data read through the ebs MCP server; receipt image data was not requested (include_receipts = N), and no line has any attachment name. Tools used: ebs_list_expense_reports, ebs_get_expense_reports (extended), ebs_get_expense_report_approval_and_payment, ebs_get_agency_policy_rules, ebs_get_award_terms, ebs_find_duplicate_expense_lines.
- **Data handling:** Free-text justification fields were treated as untrusted data; none contained instructions.
